**Training & workshops**

# Comprehensive services from a single source

## Custom training courses

We offer tailor-made workshops and train your employees on the exact equipment you use in your company. You will then be able to perform simple maintenance tasks in house and guarantee that your production equipment is handled safely and professionally.

## Outstanding services

Our Customer Service Centre offers you a wide range of services from a single source. In this way, we keep your Tool-Temp temperature control and cooling units running smoothly and keep downtimes at your production facility to a minimum.

## Active planning support

We provide advice on power ratings to help you to select units of the right size so you can be sure that your system is properly designed.

## Proactive maintenance

We perform regular maintenance work and equipment inspections for customers who sign up to our service and maintenance contract. This protects your machinery investments and guarantees that your Tool-Temp products will have a long service life.

## Tool-Temp AG

Industriestrasse 30 | CH-8583 Sulgen | Switzerland

T +41 71 644 77 77 | F +41 71 644 77 00 | [www.tool-temp.ch](http://www.tool-temp.ch)

*\* This offer is only valid in Switzerland.*

### Equipment health check

Have your units put through a full range of tests at our test facility to find out about the condition of your equipment.

### Repair service

We will help you to handle unexpected breakdowns. Our Service and Repair team will be happy to provide you with expert support on site to get production back up and running as quickly as possible.

### Spare parts service

Our extensive spare parts warehouse gives you the reassurance of prompt spare parts delivery. The simple ordering process guarantees fast response and delivery times.

### Service work & agreements

Keep production processes safe with regularly serviced equipment. Our service contract will extend the service life of your equipment.

### Maintenance and revision work

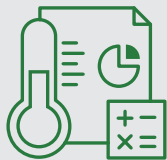

On request, we can also provide you with support for more complex plant redevelopments and major overhauls.

### Commissioning

We provide expert commissioning services for temperature control and water cooling equipment at your premises. Professional commissioning performed by experts is the perfect way to ensure that your production process starts up safely.

### Planning & design

We help our customers to plan temperature control and cooling systems that meet their requirements perfectly. This gives you the reassurance that your equipment is suitably designed for the task at hand.

### Leasing & rental

We provide flexible financing models or simply the option to supplement your machinery with rental equipment for a limited period, whether this is to conduct tests or merely to temporarily increase production capacity.

### Training & workshops

Would you like to improve your knowledge on the topics of temperature control and cooling? Do you want to have your maintenance staff trained on the subject and in the operation of your temperature control unit? We convey our knowledge using practical exercises.
